

SDG 9 – INDUSTRY INNOVATION & INFRASTRUCTURE

16 per cent of the world population does not have access to mobile broadband networks. Least Developed Countries have immense potential for industrialization in food and beverages (agro-industry), and textiles and garments, with good prospects for sustained employment generation and higher productivity

Target 9.1

Develop quality, reliable, sustainable and resilient infrastructure, including regional and trans-border infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all

Target 9.2

Promote inclusive and sustainable industrialization, and by 2030 raise significantly industry's share of employment and GDP in line with national circumstances, and double its share in LDCs

Target 9.3

9.3 Increase the access of small-scale industrial and other enterprises, particularly in developing countries, to financial services including affordable credit

SDG 9 – ACHIEVING INNOVATION & INFRASTRUCTURE

- Invest in new, resilient infrastructure in developing countries or upgrade existing infrastructure to make it more sustainable.
- Expand the geographic reach of research and development facilities, bringing R&D capabilities to developing countries.
- Promote innovation by giving all stakeholders the opportunity to offer creative solutions to sustainability challenges.
- Consult and engage a wide range of stakeholders, including minority groups, to ensure that infrastructure development benefits and creates opportunities for all.
- Collaborate with NGOs and the public sector to help promote sustainable growth within developing countries

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

SDG 10 – REDUCED INEQUALITIES

Evidence from developing countries shows that children in the poorest 20% of the populations are still up to three times more likely to die before their fifth birthday. Up to 30% of income inequality is due to inequality within households, including between women and men. Of the one billion population of persons with disabilities, 80% live in developing countries.

Target 10.1

By 2030, progressively achieve and sustain income growth of the bottom 40 per cent of the population at a rate higher than the national average

Target 10.2

By 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status

Target 10.7

Facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies

SDG 10 – ACHIEVING REDUCED INEQUALITIES

- Develop products and services tailored for poor customers (e.g. mobile based money transfer services for unbanked consumers).
- Improve access to basic goods and services for people living in poverty (e.g. through core business, policy dialogue, social investment).
- Recruit, train and employ local community members, including those living in poverty, and integrate them in your value chain (as producers, suppliers, distributors, vendors).
- Invest in business-driven poverty eradication activities (e.g. develop living wage policy).
- Partner with civil society networks to provide education and entrepreneurial skills training.

10 REDUCED INEQUALITIES

SDG 11 –SUSTAINABLE CITIES AND COMMUNITIES

3.5 billion people – lives in cities today and 5 billion people are projected to live in cities by 2030. 828 million people live in slums today and most them are found in Eastern and South-Eastern Asia. By 2050 70% of the world population is predicted to live in urban settlements.

Target 11.1

By 2030, ensure access for all to adequate, safe and affordable housing and basic services and upgrade slums

Target 11.2

By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons

Target 11.4

Strengthen efforts to protect and safeguard the world's cultural and natural heritage

SDG 11 – ACHIEVING SUSTAINABLE CITIES & COMMUNITIES

- Jointly develop and/or participate in a sustainable community that brings together relevant stakeholders through a common and neutral platform
- Use technological expertise to help build capacity of building owners to deliver solutions to improve energy efficiency in buildings and enable sound building management practices.
- Collaborate with cities and governments to find solutions to future mobility needs that minimize environmental impact while making transportation safer and more affordable for all.
- Invest in safe and sustainable infrastructure in the community and or city of operation, including lighting, transportation, alarm systems etc.

11 SUSTAINABLE CITIES AND COMMUNITIES

SDG 12 – RESPONSIBLE CONSUMPTION

Less than 3% of the world's water is fresh (drinkable), of which 2.5 per cent is frozen in the Antarctica, Arctic and glaciers. More than 1 billion people in the world do not have access to fresh water. Households consume 29% and consequently contribute to 21 per cent of resultant CO2 emissions. Each year, an estimated 1/3rd equivalent to 1.3 billion tons worth around \$1 trillion – ends up rotting in the bins of consumers and retailers. 38 million children under the age of 5 were overweight or obese in 2019.

TARGET 12.1

Implement the 10-year framework of programmes on sustainable consumption and production, all countries acting, with developed countries taking the lead, considering the development and capabilities of developing countries

TARGET 12.2

By 2030, achieve the sustainable management and efficient use of natural resources

TARGET 12.5

By 2030, substantially reduce waste generation through prevention, reduction, recycling and reuse

SDG 12 – ACHIEVING RESPONSIBLE CONSUMPTION

- Sustainable sourcing
- Resource efficiency of products and services
- Materials recycling (Circular Economy)
- Sustainable procurement practices
- Product and service information and labeling

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

SDG 13 –CLIMATE CHANGE

From 1880 to 2012, average global temperature increased by 0.85° C. Oceans have warmed, the amounts of snow and ice have diminished, and sea level has risen. Global emissions of carbon dioxide (CO₂) have increased by almost 50 per cent since 1990. Emissions grew more quickly between 2000 and 2010 than in each of the three previous decades

Target 13.1

Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries

Target 13.2

Integrate climate change measures into national policies, strategies and planning

Target 13.3

Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning

SDG 13 – ACHIEVING CLIMATE CHANGE

- Source all electricity the company consumes at its facilities from renewable sources – such as wind, solar or hydro – or install renewable energy generation capacity on-site.
- Increase investment in innovation to improve the efficiency of the company's product portfolio, thereby enabling customers to reduce their GHG emissions.
- Reduce GHG emission from transport operations with abatement levers such as reducing the carbon footprint through greater fuel efficiency, local sourcing, modal shift to lower carbon modalities
- Expand sustainable forest management through responsible sourcing practices and product substitution.

13 CLIMATE ACTION

SDG 14 – LIFE BELOW WATER

Over 3 billion depend on marine and coastal biodiversity for their livelihoods. Globally, the value of marine resources and industries is estimated at \$3 trillion per year or about 5 per cent of global GDP. Marine fisheries directly or indirectly employ over 200 million people. Around the world, one million plastic drinking bottles are purchased, while up to 5 trillion single-use plastic bags are used worldwide every year.

Target 14.1

By 2025, prevent and significantly reduce marine pollution of all kinds, from land-based activities, including marine debris and nutrient pollution

Target 14.2

By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive oceans

Target 14.5

By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information

SDG 14 – ACHIEVING LIFE BELOW WATER

- Track the life cycle of products and materials in order to understand how they are disposed, and which products could likely find their way into marine environments.
- Improve resource efficiency by generating value from waste.
- Prevent waste mismanagement or littering that could pollute the marine environment.
- Prohibit practices that put marine species and resources at further risk of harm, exploitation or depletion.
- Raise consumer awareness on effective ways to properly dispose of their waste to discourage littering and promote responsible behavior.

14 LIFE BELOW WATER

SDG 15 – LIFE ON LAND

Around 1.6 billion people depend on forests for their livelihood, including 70 million indigenous people. Forests are home to more than 80 per cent of all terrestrial species of animals, plants and insects. Due to drought and desertification, 12 million hectares are lost each year (23 hectares per minute). Of the 8,300 animal breeds known, 8% are extinct and 22 per cent are at risk of extinction.

Target 15.1

By 2020, ensure conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreement

Target 15.3

By 2020, combat desertification, and restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land-degradation neutral world

Target 15.5

Take urgent and significant action to reduce degradation of natural habitat, halt the loss of biodiversity, and by 2020 protect and prevent the extinction of threatened species

SDG 15 – ACHIEVING LIFE ON LAND

- Measure, manage and mitigate impacts on ecosystems and natural resources.
- Scale up best practices for land use planning and management.
- Invest in natural infrastructure as a cost-competitive alternative to grey infrastructure.
- Finance the restoration of degraded land for production and/or conservation purposes.
- Support and apply landscape approaches, based on multi-stakeholder dialogue and collaborative action, to overcome social and environmental fracture lines in landscapes facing deforestation, land and ecosystem degradation.
- Commit to and implement responsible sourcing practices beyond compliance - applying environmental and social safeguards - for all raw materials and commodities

SDG 16 – PEACE, JUSTICE & STRONG INSTITUTIONS

Corruption, bribery, theft and tax evasion cost some US \$1.26 trillion for developing countries per year. Approximately 28.5 million primary school age who are out of school live in conflict-affected areas. The number of people fleeing war, persecution and conflict exceeded 70 million in 2018. 50 per cent of the world's children experience violence every year. Every 7 minutes, somewhere in the world, a child is killed by violence.

Target 16.1

Significantly reduce all forms of violence and related death rates everywhere

Target 16.2

End abuse, exploitation, trafficking and all forms of violence against and torture of children

Target 16.5

Substantially reduce corruption and bribery in all their forms

Target 16.9

By 2030, provide legal identity for all, including birth registration

SDG 16 – ACHIEVING PEACE, JUSTICE & STRONG INSTITUTIONS

- Comply with laws and seek to meet international standards; require and support business partners to do the same.
- Commit to and implement conflict-sensitive, lawful and transparent operational policies and practices, including on human resources, public and corporate procurement, and in the value chain more generally.
- Conduct risk and impact assessments to identify and mitigate risks of contributing to corruption, violence and conflict, and weakening of the rule of law and identify opportunities for positive impacts.
- Measure and report on implementation progress, including on operations in high-risk areas.
- Engage in public-private dialogues, partnerships and collective action in conflict prevention, peacekeeping, peacebuilding, anti-corruption and the rule of law.

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

SDG 17 – PARTNERSHIPS

79% of imports from developing countries enter developed countries duty-free. The debt burden on developing countries remains stable at about 3 per cent of export revenue. Trade, foreign direct investment and remittances all projected to decline by up to 40 per cent in 2020.

17.1 Strengthen domestic resource mobilization, including through international support to developing countries, to improve domestic capacity for tax and other revenue collection

17.3 Mobilize additional financial resources for developing countries from multiple sources

17.5 Adopt and implement investment promotion regimes for least developed countries

17.8 Fully operationalize the technology bank and science, technology and innovation capacity-building mechanism for least developed countries

SDG 17 – PARTNERSHIPS

17.10 Promote a universal, rules-based, open, non-discriminatory and equitable multilateral trading system under the World Trade Organization,

17.13 Enhance global macroeconomic stability, including through policy coordination and policy coherence

17.15 Respect each country's policy space and leadership to establish and implement policies for poverty eradication and sustainable development

17.17 Encourage and promote effective public, public-private and civil society partnerships, building on the experience and resourcing strategies of partnerships

17.19 By 2030, build on existing initiatives to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

SDG 17 – ACHIEVING PARTNERSHIPS

- Support export by buying products from developing countries. Pay attention to the Fair-Trade label on products which helps to indicate products from local producers in developing countries.
- Broker meaningful multi-stakeholder coalitions and alliances by convening diverse stakeholders around common results for children
- Leverage and pool resources, capacities, technology and data in an integrated manner
- Strengthen partnerships and platforms that are child, adolescent and youth-centered at national and sub-national levels

17 PARTNERSHIPS FOR THE GOALS

BE RESPONSIBLE

BE KIND

BE RESPECTFUL
