

Web-Based Application Development

24.1 UGC/VU Faculty of Computing

Lab sheet 06

Question No 01.

Create a simple "Personal Blog" webpage using HTML and CSS. The webpage should include the following:

1. A main heading with the text "Welcome to My Personal Blog", centered, and styled with a custom font size and color.
2. A background color for the entire page.
3. Include an image at the top of the page, centered and styled with a border.
4. Create a navigation bar with links to "Home", "About Me", "Blog Posts", and "Contact", styled horizontally with background color, padding, and hover effects.
5. Clicking on **"Contact"** should redirect to another **"Contact" page**, which includes a contact form with fields for the user's **name**, **email**, **message**, and a submit button.
6. Use a paragraph of text introducing yourself, with custom font style, size, and line spacing.
7. Add an unordered list of your hobbies or interests, with each list item styled differently (e.g., bold, different color).
8. Add a footer with the text "Created by [Your Name]", and style the footer with a background color, padding, and centered text.

Use the <style> tag inside the <head> of your HTML to include all the CSS styles.

Question No 02.

Provide the HTML, and CSS code to generate the below output.

TIMETABLE				
Monday	Tuesday	Wednesday	Thursday	Friday
Maths	Geography	Literature	Maths	Drama
