Lab sheet 05

Question No 01.

Create a simple webpage for a travel blog. The page should include the following:

1. A background color of your choice.
2. A heading with the text "Welcome to My Travel Blog".
3. An image of a world map (use any image URL for the src attribute).
4. A navigation bar with links to "Home", "About", and "Contact" pages.
5. An unordered list of your top 3 travel destinations (e.g., "Paris", "Tokyo", "New York").
6. Each destination should include a link to a page (or external site) for more information.

Example output: Your webpage should display a heading, an image, a navigation bar with links, a list of travel destinations, and a background color.

Question No 02.

Create a simple webpage for a music event website. The page should include the following:

1. A main heading with the text "Annual Music Festival".
2. An ordered list of the top 3 performing artists.
3. A table displaying 3 different performance times and stages.
4. Embed an audio clip of one of the performing artists.
5. Embed a video of the event highlights from the previous year.
6. A form to collect visitor feedback with fields for the visitor's name, email, and feedback message, along with a submit button.

Question No 03.

Create a webpage for a "**Portfolio**" website. The page should include the following HTML basics:

1. A **main heading** with the text "Welcome to My Portfolio".
2. A **paragraph** that introduces yourself and describes your skills.
3. Add a **background color** for the entire page.
4. Include an **image** (e.g., your photo) in the center of the page.
5. Create a **navigation bar** with links to different sections: "About Me", "Projects", and "Contact".
6. Use an **unordered list** to display a list of your skills.
7. Create a **table** listing at least three of your projects, including the project name, description, and a link to the project.
8. Embed a **video** that showcases one of your projects.
9. Include an **audio clip** to play a podcast or any related audio content.
10. Create a **form** that allows visitors to submit their contact details (name, email, and message) with a submit button.
11. Ensure the form fields have **placeholder text**.
12. Add **links** in the navigation that scroll to the appropriate section on the same page.
